NTANDO MTIMKULU

DATA ANALYST | BUSINESS INTELLIGENCE | PROGRAMME REPORTING

ntandostb@gmail.com | [Phone number] | [City, Province, South Africa] | [LinkedIn profile]

PROFESSIONAL PROFILE

Project Manager with approximately three years of experience coordinating programmes and using operational information to support reporting, planning and decision making. Experienced in Excel based tracking, data cleaning, data modelling, performance reporting, financial tracking and process improvement. Has prepared programme reports and contributed to proposal writing. Holds a Bachelor of Arts in Economics, Law and Politics and a Postgraduate Diploma in Enterprise Management from Rhodes University. Trained in software engineering, business intelligence and project management. Interested in using data to help organisations monitor performance, improve processes and make informed decisions.

CORE SKILLS

- Data analysis and data cleaning
- Business intelligence and management reporting
- Excel formulas, PivotTables, charts and dashboards
- Data modelling and data organisation
- Power Query data transformation
- SQL fundamentals and Python fundamentals
- Power BI training
- Programme and financial performance tracking
- Budget and expenditure analysis
- Process mapping and process intelligence
- Report writing and proposal development
- Project coordination and stakeholder communication

PROFESSIONAL EXPERIENCE

Project Manager

enke: Make Your Mark | [Month Year to Present]

- Coordinate programme planning, delivery and reporting across schools and regions.
- Maintain and improve Excel based trackers for learners, workshops, champions, finances and programme activities.
- Organise programme data using consistent fields, identifiers and categories to support accurate analysis and reporting.
- Review operational data, identify missing or inconsistent information, and follow up to resolve issues.
- Prepare programme reports and updates covering progress, delivery issues, risks and required actions.
- Contribute to proposal writing by organising programme information and describing planned activities, needs and expected results.
- Develop tracking tools that help the team compare planned activities with actual delivery.
- Track programme costs and support analysis of budgets, expenditure and variances.
- Map programme processes, clarify information requirements and identify opportunities to improve monitoring and handover.
- Work with colleagues, schools, facilitators and service providers to gather and check programme information.
- Support delivery of Trailblazer+ across eight schools in Bochum and Eldorado, serving more than 1,000 learners.

DATA ANALYSIS AND BUSINESS INTELLIGENCE EXPERIENCE

Programme Data and Reporting

- Developed Excel based registers and tracking tools for beneficiaries, champions, workshops and programme activities.
- Structured information for reporting by school, region, grade and activity.
- Used consistent identifiers and categories to make records easier to update, review and analyse.
- Helped monitor programme progress, evidence requirements and outstanding actions.

Financial Performance Tracking

- Developed finance tracking tools for programme activities, including workshops, training, site visits and events.
- Organised budget and expenditure information to support variance analysis by activity and budget line.
- Created a structure for linking individual costing sheets to an overall variance tracker.

Data Cleaning and Analysis

- Used Excel and Power Query to clean learner data and prepare information for analysis.
- Applied school and region mapping logic to classify schools consistently as Bochum or Eldorado.
- Prepared structured data for school level analysis and dashboard reporting.

EDUCATION

Postgraduate Diploma in Enterprise Management
Rhodes University | 2024

Bachelor of Arts in Economics, Law and Politics
Rhodes University | 2019 to 2023

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT
