PROJECT MANAGEMENT | DATA ANALYSIS | BUSINESS INTELLIGENCE

ntandostb@gmail.com | Johannesburg, South Africa

PROFESSIONAL PROFILE

Project Manager with three years of experience managing programme delivery against an annual budget of R3 million, totalling R9 million over the full programme period. I write programme reports and contribute to proposals, while tracking delivery plans, risks and costs to support project decisions. I have improved how programme information is organised and processed for analysis and reporting. My academic background includes a Bachelor of Arts in Economics, Law and Politics and a Postgraduate Diploma in Enterprise Management. I am focused on Business Intelligence and developing my financial modelling skills.

CORE CAPABILITIES

Business intelligence Performance reporting, data analysis, visualisation and decision support	**Data and systems** Excel, Power Query, data modelling, data quality and SQL foundations
Project delivery Planning, risk and action tracking, coordination and proposal support	**Financial analysis** Budget tracking, expenditure analysis, variance review and financial modelling

PROFESSIONAL EXPERIENCE

Project Manager

enke: Make Your Mark

Manage programme planning, delivery and reporting for a three year programme with an annual budget of R3 million, totalling R9 million.

- Improved programme data handling and processing through structured trackers, consistent fields and data quality checks.
- Analysed programme and financial information and prepared visual reporting to support decisions on delivery, risks and resources.
- Prepared programme reports and contributed to proposal writing by organising programme information and describing planned activities and expected results.
- Tracked costs, risks, planned activities and actual delivery, helping teams identify issues and agree next actions.
- Coordinated schools, facilitators, colleagues and service providers across programme activities.

APPLIED DATA AND BUSINESS INTELLIGENCE WORK

Data handling and processing

Organised operational records with consistent fields and identifiers. Used Excel and Power Query to clean, transform and prepare data for reporting.

Analysis and visualisation

Reviewed programme activity and financial information, then presented progress, exceptions and trends in clear reports and visual summaries.

Data modelling

Defined data entities, keys and relationships to connect programmes, activities and results and strengthen reporting structure.

Financial modelling

Developing scenario based models that connect operational assumptions and delivery drivers to forecasts, actual spend and variance analysis.

EDUCATION

Postgraduate Diploma in Enterprise Management
Rhodes University | 2024

Bachelor of Arts in Economics, Law and Politics
Rhodes University | 2019 to 2023

Software Engineering
Hyperion Development

PROFESSIONAL DEVELOPMENT

- Microsoft Power Platform Associate
- Microsoft Certified: Power Platform Fundamentals, PL 900 | Microsoft | 2025 to 2028
- Microsoft Power BI for Business Intelligence
- Certified Business Intelligence Professional | Google and Coursera
- Business Intelligence, Data Analysis and Reporting | Coursera
- Financial Statement Analysis, Investment Appraisal and Data Driven Decision Making | Coursera
- Project Management Support Certificate | IBM
- Scrum Master Specialisation | SkillUp EdTech
- Managing ERP Implementation | Udemy

TECHNICAL SKILLS

Microsoft Excel
Formulas, structured trackers, PivotTables, charts, dashboards and financial analysis

Power Query
Data cleaning, transformation and preparation

Power Platform
Power Apps, data visualisation and low code business solutions

SQL
Foundational querying and database concepts

Python
Foundational programming and pandas based data preparation

Microsoft Power BI
Business intelligence training and visual reporting

SharePoint, Word and PowerPoint
Shared information sources, reporting and presentation materials

CAREER DIRECTION

Business Intelligence. I am building on practical experience improving data handling, processing, analysis and visualisation, and using information to support project decisions. My next step is to deepen this capability through BI work and financial modelling.
